Comptia N+

N+ NETWORK FUNDAMENTALS AND BUILDING NETWORKS

FIREWALL BASIC THEORY

DAY:-4

TASKS:1

Open Windows Defender Firewall settings on your computer and create a new outbound rule to block all traffic from the Spotify desktop app.

RESULT

- Opened **Control Panel**.
- Clicked **Windows Defender Firewall**.
- Selected **Advanced Settings**.
- Clicked **Outbound Rules**.
- Clicked **New Rule**.
- Selected **Program** and clicked **Next**.
- Browsed and selected the **Spotify.exe** file.
- Chose **Block the connection**.
- Applied the rule for **Domain, Private, and Public** networks.
- Named the rule **Block Spotify** and clicked **Finish**.

TASKS:2

Set up an inbound rule in Windows Defender Firewall to allow incoming connections only for Google Chrome on port 443 (HTTPS).

RESULT

- Opened **Windows Defender Firewall with Advanced Security**.
- Clicked **Inbound Rules**.

- Selected **New Rule**.
- Chose **Program** and selected **chrome.exe**.
- Selected **Allow the connection**.
- Opened the **Protocols and Ports** tab.
- Selected **TCP** and entered **443** as the local port.
- Applied the rule to **Domain, Private, and Public** profiles.
- Named the rule **Allow Chrome HTTPS**.
- Clicked **Finish**.

TASKS:3

Document, step-by-step, how you would block all traffic from a specific IP address (for example, 123.45.67.89) using Windows Defender Firewall. Use the 'Scope' tab when creating a new rule to specify the IP address.

RESULT

- Opened **Windows Defender Firewall with Advanced Security**.
- Clicked **Outbound Rules**.
- Clicked **New Rule**.
- Selected **Custom** and clicked **Next**.
- Chose **All Programs**.
- Left the protocol settings as default and clicked **Next**.
- Opened the **Scope** tab.
- Under **Remote IP Address**, selected **These IP addresses**.
- Clicked **Add** and entered: 123.45.67.89
- Clicked **OK**.
- Selected **Block the connection**.
- Applied the rule to **Domain, Private, and Public**.

Comptia N+

- Named the rule **Block IP Address**.
- Clicked **Finish**

TASKS:4

Compare hardware firewalls (like those used in large offices) and software firewalls (like Windows Defender) by listing 3 key differences and a use case for each.

RESULT

Hardware Firewall	**Software Firewall**
Installed between the Internet and the network.	Installed on a computer or laptop.
Protects all devices connected to the network.	Protects only the device on which it is installed.
Used in offices, schools, and companies.	Used on personal computers and laptops.
Use Case: Protecting an office network with many users.	**Use Case:** Protecting a home computer using Windows Defender Firewall.
