

A+ - Peripherals and Power Supply

TOPIC

- ➔ Overview of Peripherals Theory
- ➔ Functions of printers, scanners webcams, and their connection interfaces.

TASKS:1

Create a table listing 3 types of printers, 2 types of scanners, and 2 types of webcams, and for each, write one real-life use case.

RESULT

Printers, Scanners, and Webcams

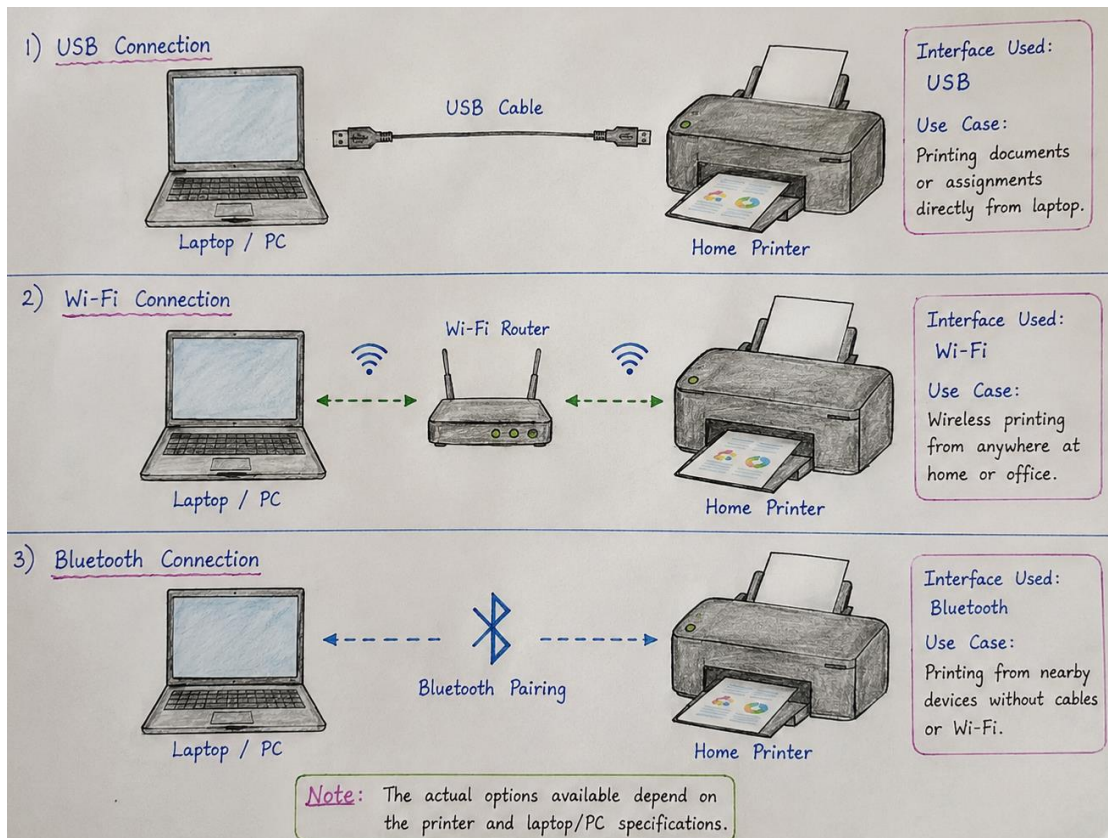

Category	Type	Real-Life Use Case
Printer	Inkjet Printer	Printing college assignments and color photos
Printer	Laser Printer	Printing large amounts of office documents
Printer	3D Printer	Creating 3D models and prototypes
Scanner	Flatbed Scanner	Scanning certificates and documents
Scanner	Sheet-fed Scanner	Scanning multiple pages quickly in an office
Webcam	Built-in Webcam	Attending online classes or video calls
Webcam	External USB Webcam	Streaming or video conferencing on a desktop PC

TASKS:2

Draw a labeled diagram showing how a typical home printer connects to a laptop or PC, including the connection interface used (USB, Wi-Fi, or Bluetooth).

RESULT

Step-by-Step: Home Printer Connection Diagram

1. USB CONNECTION

USB Cable

Interface Used: USB

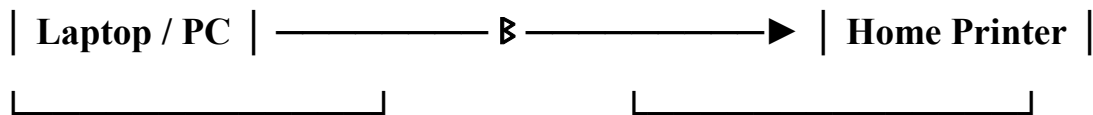

2. WI-FI CONNECTION

Interface Used: Wi-Fi

3. BLUETOOTH CONNECTION

Bluetooth

Interface Used: Bluetooth

TASKS:3

List three different connection interfaces (such as USB, Wi-Fi, Bluetooth) used by peripherals like printers, scanners, and webcams, and for each, name one advantage and one disadvantage.

RESULT

Connection Interfaces Used by Peripherals

Connection Interface	Advantage	Disadvantage
USB	Fast and reliable connection; easy to use.	Requires a physical cable and available USB port.
Wi-Fi	Wireless and convenient; multiple devices can connect to the same printer/scanner.	Can be slower or unreliable if the Wi-Fi signal is weak.
BLUETOOTH	Wireless, simple, and does not require a Wi-Fi network.	Shorter range and generally slower than USB.

Conclusion:

USB is best for speed and reliability, while Wi-Fi and Bluetooth provide greater convenience because they are wireless.

TASKS:4

Pick any one device you use at home or college (printer, scanner, or webcam). Write step-by-step instructions for how you would connect it to your computer, including what cable or wireless method you would use and any setup steps required.

RESULT

Device Selected: Printer

Connection Method: USB Cable

- First, I will place the printer near my computer and connect the printer to a power source.
- I will switch on the printer and wait for it to start.
- I will take a **USB printer cable** and connect one end to the printer.
- I will connect the other end of the USB cable to an available USB port on my computer.
- The computer should detect the printer automatically.
- If required, I will install the printer driver or printer software provided by the manufacturer.
- I will open **Settings → Bluetooth & devices → Printers & scanners** on Windows.
- I will check that my printer appears in the list of available printers.

- I will select the printer and set it as the default printer if needed.
- Finally, I will print a **test page** to check that the printer is connected and working properly.

CONCLUSION

The printer is successfully connected to the computer using a USB cable and is ready for printing.
