

DAY 4

TOPIC

- **Connecting and testing peripherals**
- **Set up and test peripherals like printers and webcam**
- **Resolve connectivity issues for a given setup**

TASKS:1

Connect a USB webcam to your computer, install any required drivers, and verify that the webcam works by opening the default camera app and capturing a photo.

RESULT

Steps to Connect and Test a USB Webcam

1. Connect the **USB webcam** to an available USB port on the computer.
2. Wait for Windows to detect the webcam automatically.
3. If required, **install or update the webcam driver**.

4. Open the **Camera app** on the computer.
5. Check whether the webcam displays a live video preview.
6. Click the **Capture/Photo button** to take a picture.
7. Check the saved photo to confirm that the webcam is **working properly**.

TASKS:2

Set up a local printer (USB or network), install the correct driver, and print a test page to confirm successful installation.

RESULT

Steps to Set Up and Test a Local Printer

1. Connect the Printer

- For a USB printer, connect the printer to the computer using a **USB cable**.
- For a network printer, connect the printer and computer to the **same Wi-Fi network**.

2. Turn On the Printer

- Switch on the printer and make sure there are no error indicators.

3. Install the Printer Driver

- Windows may install the driver automatically.
- If required, install the **correct driver for the printer model**.

4. Add the Printer

- Go to **Settings → Devices → Printers & scanners**.
- Click **Add a printer or scanner** and select your printer.

5. Set the Printer

- Select the printer as the **default printer** if required.

6. Print a Test Page

- Open **Printer Properties** and select **Print Test Page**.

7. Confirm Installation

- Check that the test page prints correctly. This confirms that the printer, driver, and connection are working properly.

TASKS:3

Simulate a connectivity issue by unplugging the printer's USB cable, then use Windows Device Manager to identify and resolve the 'printer not detected' problem.

RESULT

Printer Not Detected – Troubleshooting Steps

1. **Disconnect the USB cable** from the printer to simulate the connectivity problem.
2. Open **Device Manager** by right-clicking the Start button and selecting **Device Manager**.
3. Expand **Printers, Print queues, or Universal Serial Bus controllers**.
4. Look for the printer or a device with a **yellow warning icon** or other error symbol.
5. **Reconnect the printer's USB cable** and make sure the printer is switched on.
6. In Device Manager, click **Action → Scan for hardware changes**.
7. Check whether the printer appears again without an error icon.
8. If a driver problem is shown, **update or reinstall the printer driver**.
9. Finally, open **Settings → Devices → Printers & scanners** and confirm that the printer is detected and ready to use.

TASKS:4

A user reports that their webcam video is not displaying in Zoom, but it works in the default camera app. Troubleshoot and resolve the issue so the webcam works in both applications.

RESULT

- ❑ **Close the Camera app** and any other application that may be using the webcam.
- ❑ Open **Zoom → Settings → Video**.
- ❑ Under **Camera**, select the correct **external webcam**.
- ❑ Check the **Windows Camera Privacy Settings** and make sure camera access is enabled.
- ❑ Make sure “**Allow desktop apps to access your camera**” is turned **ON**.
- ❑ Restart **Zoom** and test the video again.
- ❑ If it still does not work, **restart the computer** and open Zoom again.
- ❑ Finally, check the Zoom video preview to confirm that the **webcam is displaying properly**.
